WELCOME

About This Guide

This guide explains, step by step, how the four administrators use the Ministry of Altar Servers Member Management System, and how to keep the records safe.

What the system is

The system is a private website for the ministry's administrators. It keeps member records, schedules and records activities, shows a history of every change, and prints attendance sheets and reports. It works on a phone and on a laptop. The records are stored securely online, so every administrator sees the same up-to-date information.

How to read this guide

- **Figures** are pictures of the real screens. Every name, number and date in them is invented. Gold numbered markers point to the parts described next to each picture.
- **Numbered steps** are things to do, in order.
- Coloured boxes give extra help: green for *tips*, purple for *notes*, and red for *important* warnings.

> **TIP**
> Most figures show the phone view. On a laptop the same screens are wider, and the main menu sits under the header instead of at the bottom.

What you need

The website address of the system (ask the head admin), your own administrator account (an email address and a password that only you know), and an internet connection.

CHAPTER 1

Getting Started

Signing in, choosing your own password, and finding your way around.

1.1 Signing in

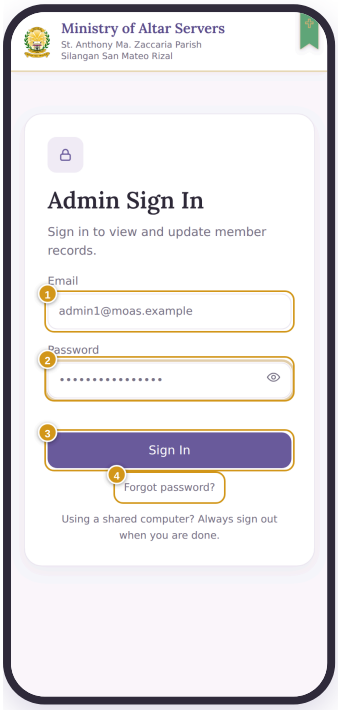

FIGURE 1

Admin Sign In

Only administrator accounts can sign in. There is no public sign-up.

IN THE PICTURE

1. Your email address
2. Your password. Tap the eye to show what you typed.
3. Sign In
4. Forgot password? Type your email first, then tap this.

STEPS

1. Open the website address.
2. Type your email address and your password.
3. Tap **Sign In**.

> **NOTE**
> After **5 wrong attempts** the page blocks sign-in on that device for 5 minutes. Wait, then try again carefully.

1.2 If you forget your password

1. On the sign-in page, type your email address in the email box.
2. Tap **Forgot password?**
3. Open your email and find the message from the system. If it is not in your inbox, look in **Spam**.
4. Tap the link and choose a new password. Then sign in as usual.

The page always shows the same message, even for an email that is not registered. This is on purpose, so strangers cannot find out which emails are administrators.

1.3 Changing your password

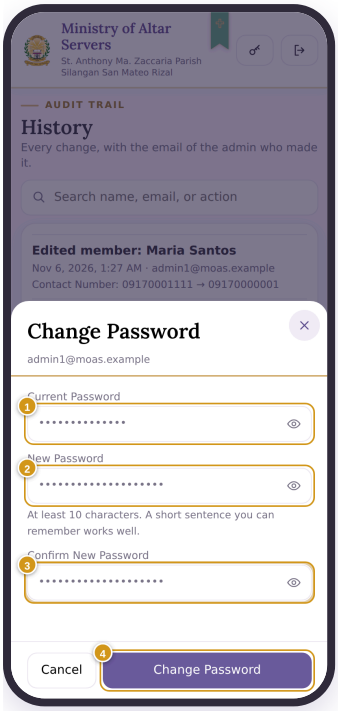

FIGURE 2

Change Password

Tap the **key button** in the header at any time you want a new password.

IN THE PICTURE

1. Current password
2. New password, at least 10 characters
3. Type the new password again
4. Change Password

STEPS

1. Type your current password.
2. Type a new password of at least 10 characters, then type it again.
3. Tap **Change Password**.

TIP

A short sentence you can remember, such as *my new long password*, is stronger than a short word with symbols.

IMPORTANT

Never share your password, and never write it where others can see it. The system never shows or stores your password. History only records that a password change happened.

1.4 Staying signed in, and signing out

To protect the records, the system signs you out by itself in these cases:

When	What happens
10 minutes without touching the screen	A **Still There?** warning counts down 60 seconds. Tap **Stay Signed In** to continue.
8 hours after signing in	You must sign in again, even if you were active.
You close the browser tab or the browser	You are signed out.

When you finish, tap **Sign Out** in the header (the arrow icon). Always do this on a shared computer or someone else's phone.

1.5 Finding your way around

The main menu has four pages: **Dashboard**, **Members**, **Activities** and **History**. On a phone it is the bar at the bottom of the screen. On a laptop it is the row of tabs under the header.

The small ribbon in the header changes colour with the church season (green for Ordinary Time, purple for Advent and Lent, white or gold for Christmas and Easter, red for Palm Sunday, Good Friday and Pentecost). The dashboard also names the current season.

CHAPTER 2

The Dashboard

One page that shows the state of the whole ministry at a glance. It is the first page you see after signing in.

2.1 The top of the dashboard

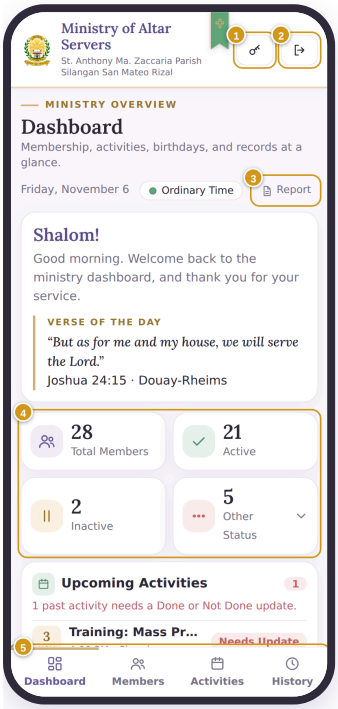

FIGURE 3

Welcome and numbers

The page greets you and shows a **Verse of the Day** from the Douay-Rheims Bible. The verse changes daily.

The four number cards count members by status. Tap **Other Status** to open a list that shows how many members are Probationary, On Leave, Suspended, Graduated, Deceased, Transferred, Honorary or Alumni, or Removed.

IN THE PICTURE

1. Change Password
2. Sign Out
3. Report creates the Ministry Report
4. Number cards: total, active, inactive, other status
5. Main menu

2.2 Activities and groups

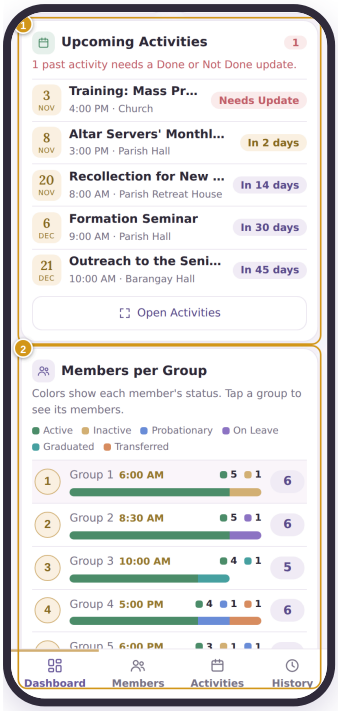

FIGURE 4

Upcoming Activities and Members per Group

Upcoming Activities lists the next scheduled items. A red **Needs Update** label means the date has passed but nobody has marked the activity Done or Not Done.

Each group's bar is divided into colours by status, and the colour key is shown above the bars. The time beside each group is its Sunday Mass: Group 1 at 6:00 AM, Group 2 at 8:30 AM, Group 3 at 10:00 AM, Group 4 at 5:00 PM and Group 5 at 6:00 PM.

IN THE PICTURE

1. Upcoming Activities. Red means a past activity needs an update.
2. Members per Group. Tap a group to see its members.

2.3 Birthdays, officers and records

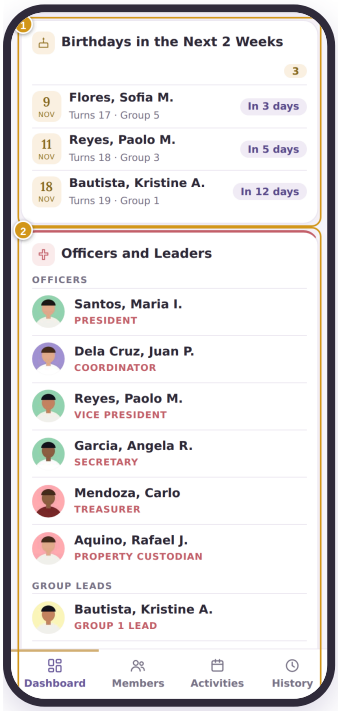

FIGURE 5

Birthdays, Officers and Leaders

Birthdays shows members whose birthday falls in the next 14 days. If there are none, it shows the next birthday coming up. Tap **View All** when the list is long.

Officers and Leaders shows who holds each role, with their photo when they have one: President, Coordinator, Vice President, Secretary, Treasurer, Property Custodian, and the five Group Leads. Roles nobody holds are listed as **Vacant**.

IN THE PICTURE

1. Birthdays in the next 2 weeks
2. Officers and Leaders, with vacant roles listed at the bottom

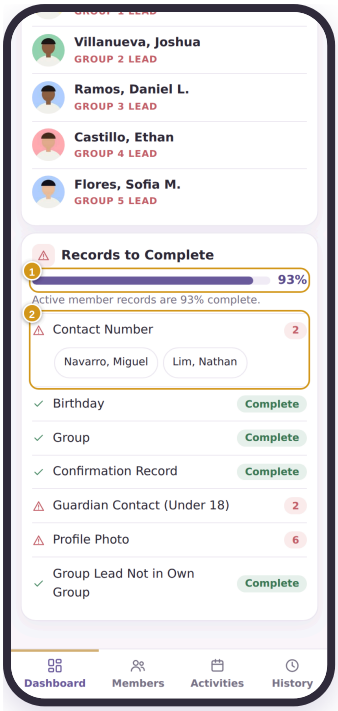

FIGURE 6

Records to Complete

This checklist covers **Active** members only. It shows what percentage of their records is complete, and lists the gaps: contact number, birthday, group, Confirmation record, profile photo, guardian contact for members under 18, and any Group Lead who is not in their own group.

IN THE PICTURE

1. How complete the Active members' records are
2. Tap a line to see who is missing that item, then tap a name to open the profile

TIP

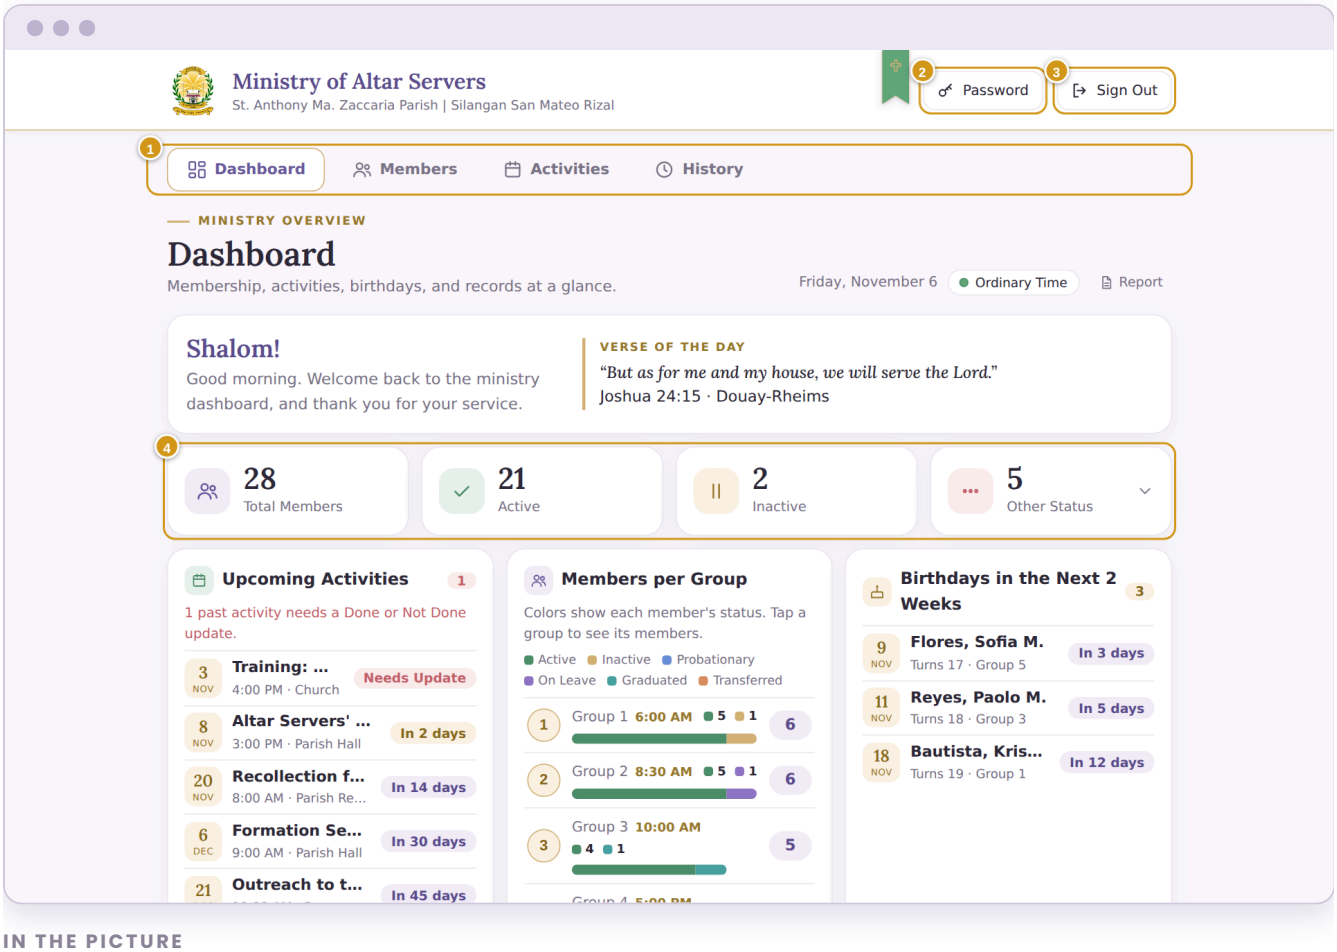

Use this list before a big event. Tap a name and the member's profile opens, ready to edit.

2.4 The dashboard on a laptop

On a laptop the same dashboard uses the wider screen. The cards sit side by side, and the main menu appears as tabs.

FIGURE 7

The dashboard on a laptop

IN THE PICTURE

1. Main menu
2. Change Password
3. Sign Out
4. Number cards

The **Report** button at the top right creates the Ministry Report for the parish priest. See Chapter 6.

CHAPTER 3

Members

Everything about the people in the ministry: finding them, reading and printing a profile, adding, editing and removing records.

3.1 The member list

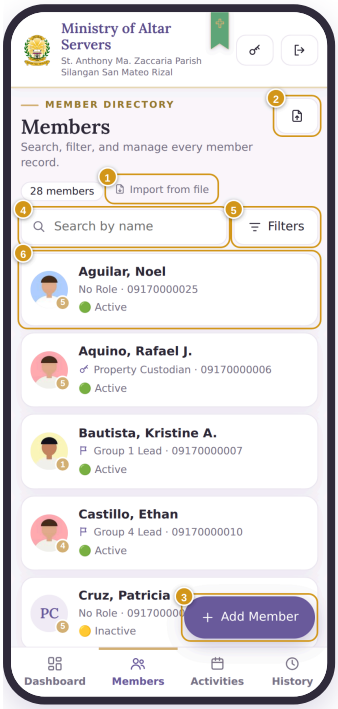

FIGURE 8

The Members page

Each card shows the member's name (last name first), role, contact number and status. The round picture is the member's photo, or their initials if there is no photo yet. The small number on it is the group.

Type any part of a first, middle or last name in the search box to narrow the list.

IN THE PICTURE

1. Import from file
2. Export
3. Add Member
4. Search by name
5. Filters
6. A member card. Tap it to open the profile.

3.2 Pages of members

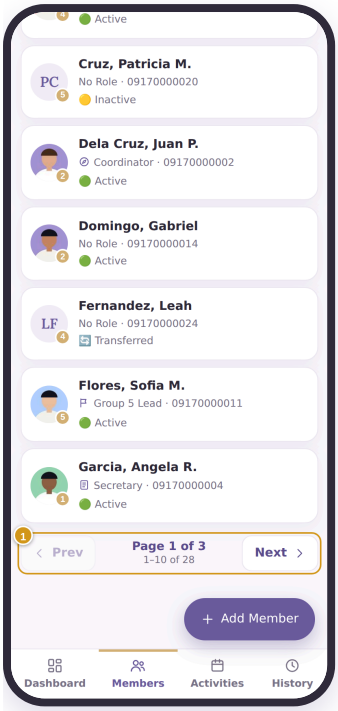

FIGURE 9

Moving between pages

The list shows **10 members per page**, so you never have to scroll endlessly. Use **Prev** and **Next**. The line under the page number shows which members you are looking at, for example 11 to 20 of 28.

Searching, filtering or sorting always returns you to page 1.

IN THE PICTURE

1. Prev, Next, and the page number

3.3 Filters and sorting

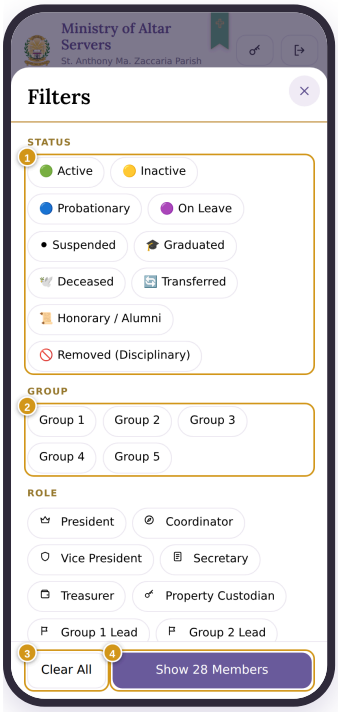

FIGURE 10

The Filters window

Choose a **Status**, a **Group** or a **Role**. Pick them together to narrow the list further, for example Active members of Group 3. You can also sort by last name or by birthday.

Chosen filters appear as small buttons under the search box. Tap one to remove it.

IN THE PICTURE

1. Status
2. Group
3. Clear All
4. Show the matching members

3.4 A member's profile

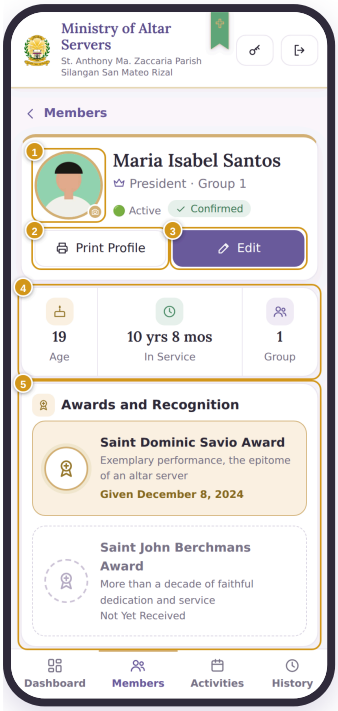

FIGURE 11

The profile page

Tap a member card to open the profile. The top shows the name, role, group, status and Confirmation. **Print Profile** opens your device's print window and includes the photo. Choose **Save as PDF** to keep a copy. Tap the **photo circle** to add or change the picture (see 3.5).

The two awards are **Saint Dominic Savio** (exemplary performance, the epitome of an altar server) and **Saint John Berchmans** (more than a decade of faithful service). The time in service is worked out from the start and end dates.

IN THE PICTURE

1. The member's photo. Tap it to add or change the picture.
2. Print Profile
3. Edit
4. Age, time in service, and group
5. Awards and recognition

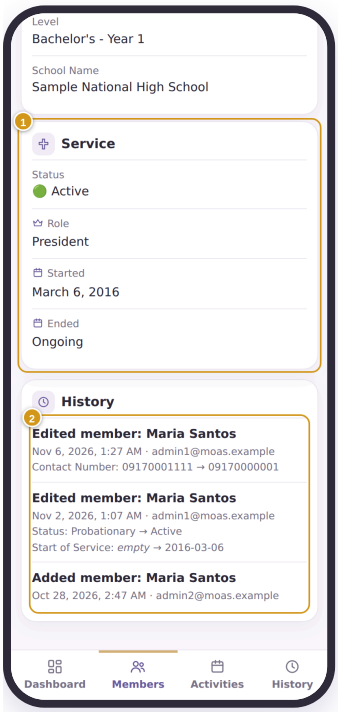

FIGURE 12

Details and history

Below the awards are the Personal, Contact, Parent or Guardian, School and Service sections. At the very bottom, **History** lists every change made to this member, with the admin's email.

IN THE PICTURE

1. Service details: status, role, start and end dates
2. This member's History, with the admin's email and the changes

3.5 Profile pictures

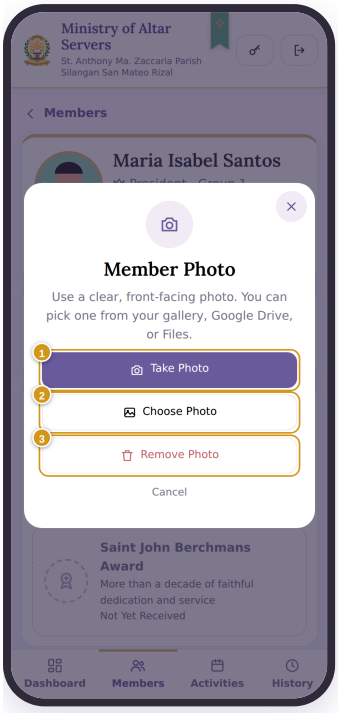

FIGURE 13

Adding or changing a photo

Open a member's profile and tap the **photo circle**, which has a small camera on it. You can also use the **Photo** button at the top of the member form when adding or editing a member.

IN THE PICTURE

1. Take Photo opens the camera on a phone
2. Choose Photo opens your gallery, Google Drive or Files
3. Remove Photo, shown only when the member already has a photo

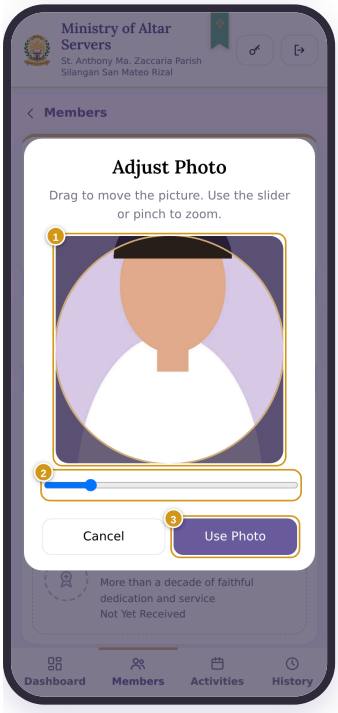

FIGURE 14

Adjusting the photo

Drag the picture and use the slider (or pinch on a phone) so the face sits in the middle of the circle, then tap **Use Photo**. The system saves two small square copies, so it stays fast.

IN THE PICTURE

1. Drag the picture so the face sits inside the circle
2. Zoom slider. On a phone you can also pinch.
3. Use Photo

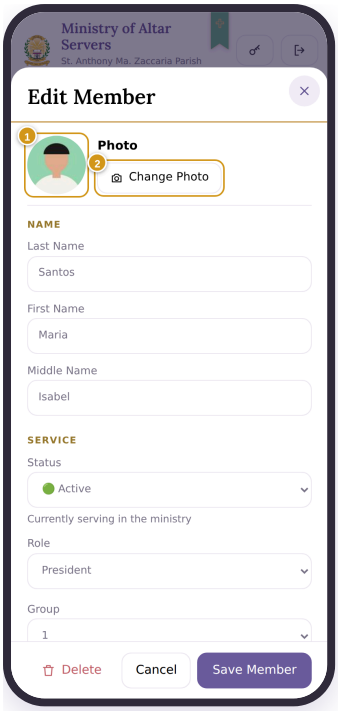

FIGURE 15

The photo row in the form

A photo chosen in the form is saved when you tap **Save Member**. **Remove Photo** brings back the initials.

IN THE PICTURE

1. The current photo, or the initials if there is none
2. Add Photo or Change Photo

The photo appears in the member list, the profile, the printed profile and the Officers and Leaders card. Photos are **not** included in CSV exports, attendance sheets or the Ministry Report.

> **TIP**
> On a phone, **Choose Photo** lets you pick from your gallery, Google Drive or Files. On a laptop, download the picture first, or use Google Drive for desktop.

> **NOTE**
> Take or keep a member's photo only with the permission of the parent or guardian. Consent is handled by the ministry outside the system.

3.6 Adding a member

1. Open **Members** and tap **Add Member**.
2. Fill in the form. Only **Last Name** and **First Name** are required.
3. Tap **Save Member**.

The form is arranged in sections: Name, Service, Personal, Contact, Parent or Guardian, School and Awards. Leave an award date empty if the award has not been received.

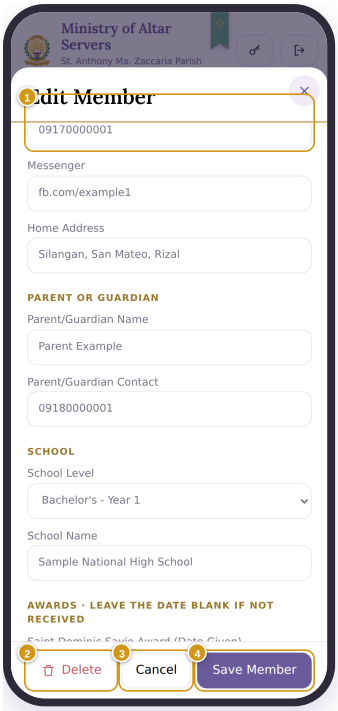

FIGURE 16

The lower part of the form

Phone numbers must be 11 digits starting with **09**, for example 09171234567. The form removes letters and spaces for you, and shows a message when the number is wrong.

To change an existing member, open the profile and tap **Edit**. The same form opens with the saved details.

IN THE PICTURE

1. Contact numbers: 11 digits starting with 09
2. Delete (only when editing)
3. Cancel
4. Save Member

3.7 Roles and groups

Each role can be held by **one member only**. Group Leads have one extra rule to avoid confusion: **a Group 3 Lead must belong to Group 3**, and so on for every group. Officers (President, Coordinator, Vice President, Secretary, Treasurer, Property Custodian) can belong to any group.

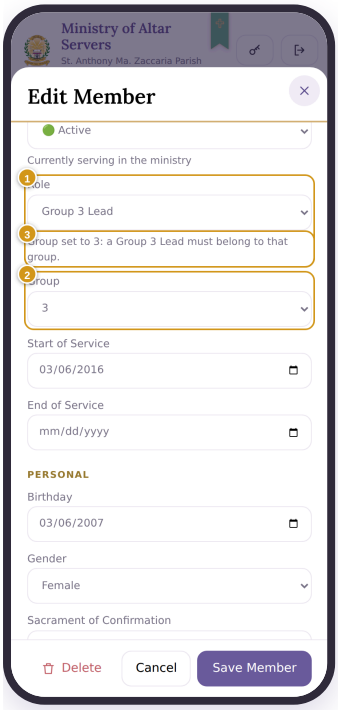

FIGURE 17

The Group Lead rule

When you choose a Group Lead role, the Group changes by itself and a notice explains why. If you change the group of a current lead, their lead role is removed and a notice tells you.

The same checks run again when you save, and when members are imported.

IN THE PICTURE

1. Role
2. Group. It changes by itself for a Group Lead role.
3. The notice that explains the change

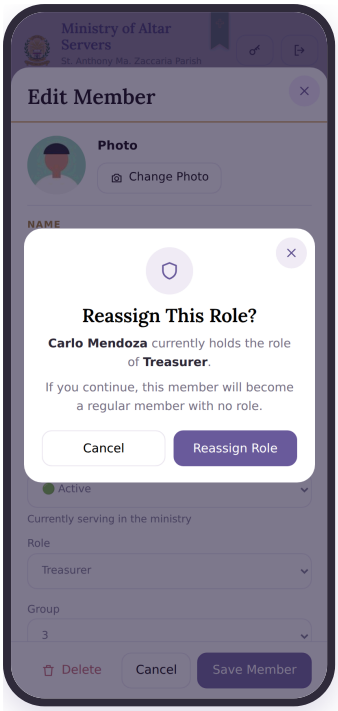

FIGURE 18

Reassigning a role

If you give a role that someone already holds, the system asks first. The earlier holder becomes a regular member without a role.

IN THE PICTURE

1. Who holds the role now, and what happens to them
2. Cancel
3. Reassign Role

3.8 What each status means

Status	Meaning
🟢 Active	Currently serving in the ministry
🟡 Inactive	Still a member, but currently not serving
🔵 Probationary	Member under observation, and subject to removal or suspension
🟣 On Leave	Temporarily unable to serve
⚫ Suspended	Temporarily restricted from serving
🎓 Graduated	Completed their time in the ministry
🕊️ Deceased	Member who has passed away
🔄 Transferred	Continued their ministry or service elsewhere
📜 Honorary / Alumni	Former member who remains part of the ministry's community
🚫 Removed (Disciplinary)	Removed from the ministry for disciplinary reasons

3.9 Deleting a member

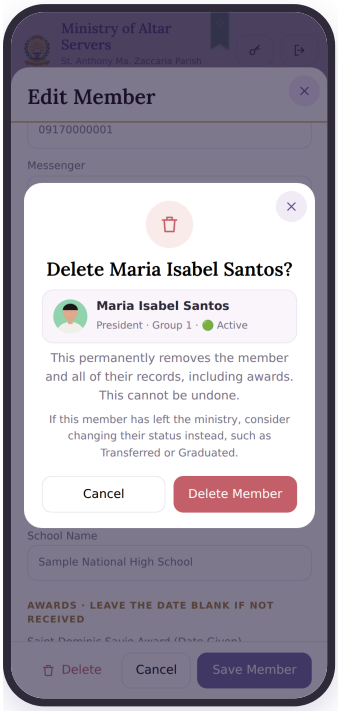

FIGURE 19

Delete confirmation

Open the member, tap **Edit**, then **Delete**. A window shows exactly who will be deleted. Deleting is **permanent**: there is no undo.

IN THE PICTURE

1. The member who will be deleted
2. Cancel
3. Delete Member

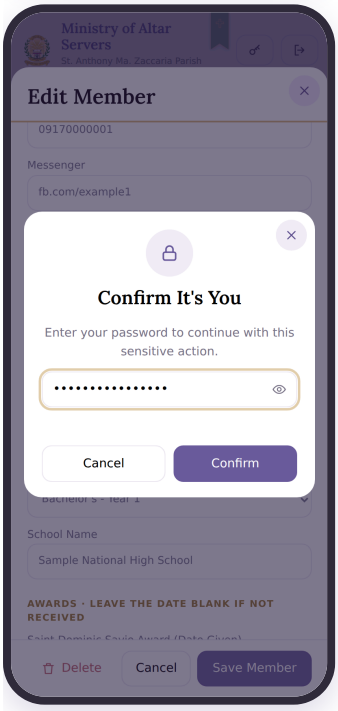

FIGURE 20

Confirm It's You

After you confirm, the system asks for your password again. The same check appears before importing members and before exporting full member details.

IN THE PICTURE

1. Type your own password. Tap the eye to check it.
2. Confirm

IMPORTANT

If a member has simply left, change the **status** (for example Transferred or Graduated) instead of deleting. The history keeps a record of who deleted a member and what the record contained.

CHAPTER 4

Activities

Plan the ministry's meetings, trainings and events, and record whether each one took place.

4.1 The Activities page

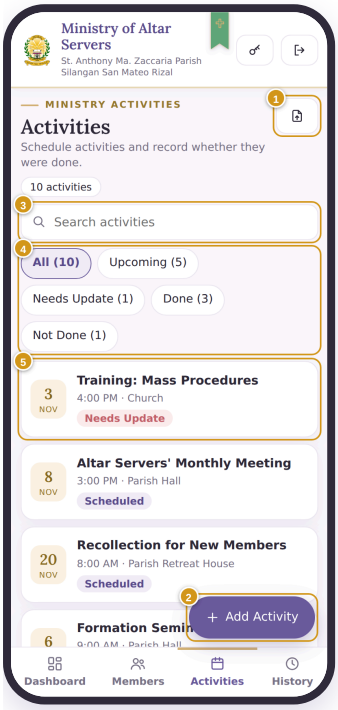

FIGURE 21

The Activities page

Each activity shows a date block, its title, the time and venue, and a coloured status label. The filter buttons show how many activities fall under each.

IN THE PICTURE

1. Export
2. Add Activity
3. Search
4. Filters with counts
5. An activity. Tap it to open.

Label	Meaning
Scheduled	Planned, and the date has not passed
Needs Update	Scheduled, but the date has passed. Mark it Done or Not Done.
Done	It took place
Not Done	It did not take place. A reason is recorded.

4.2 Scheduling an activity

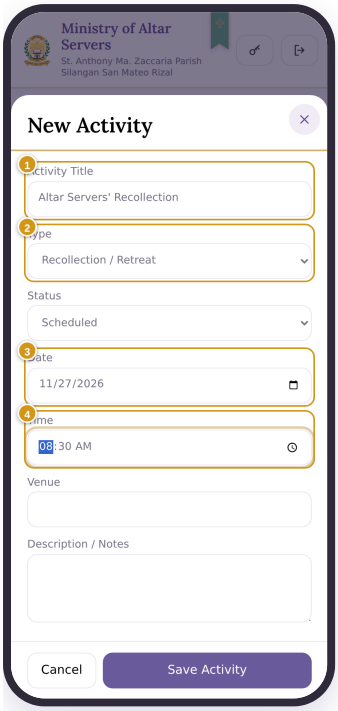

FIGURE 22

A new activity

Tap **Add Activity**. A title and a date are required. Choose a type: Mass / Liturgy, Meeting, Formation / Seminar, Training, Recollection / Retreat, Outreach / Service, Fellowship / Social, Fundraising, or Other.

IN THE PICTURE

1. Title
2. Type
3. Date
4. Time

4.3 Recording what happened

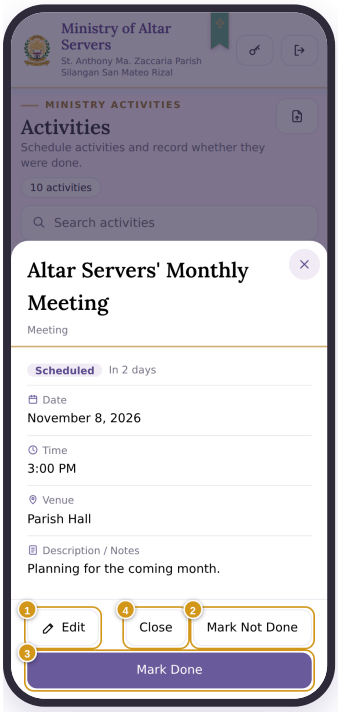

FIGURE 23

Opening an activity

Tap an activity to see its details. Use **Mark Done** or **Mark Not Done** after the date. **Edit** changes the details, and **Reopen** (on finished activities) sets it back to Scheduled and clears the remarks or reason.

IN THE PICTURE

1. Edit
2. Mark Not Done
3. Mark Done
4. Close

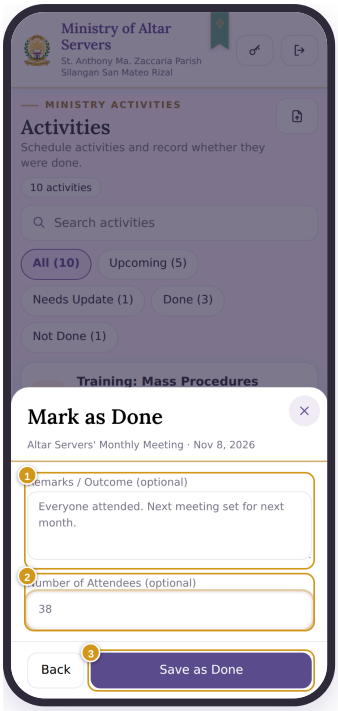

FIGURE 24

Mark as Done

Add remarks about how it went and the number of attendees. Both are optional, but they make the yearly review much more useful.

IN THE PICTURE

1. Remarks or outcome (optional)
2. Number of attendees (optional)
3. Save as Done

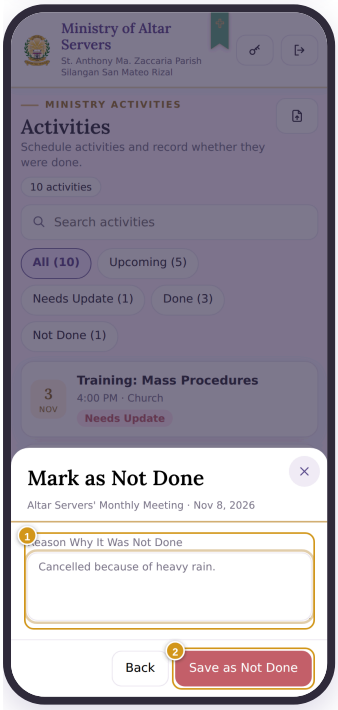

FIGURE 25

Mark as Not Done

A reason is required, for example *cancelled because of bad weather*. The reason appears on the activity card and in the reports.

IN THE PICTURE

1. The reason is required
2. Save as Not Done

4.4 The reminder pop-up

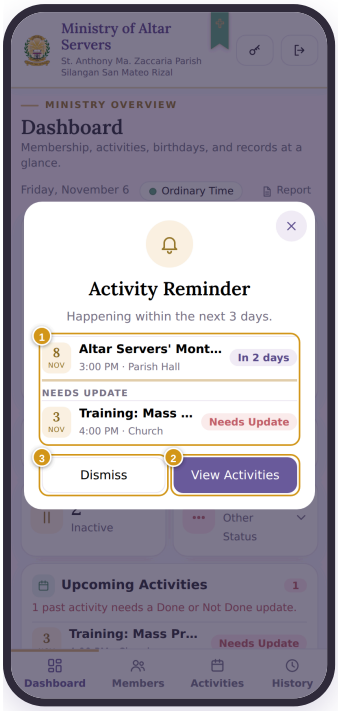

FIGURE 26

Activity Reminder

Once after you sign in, a pop-up lists activities coming in the next 3 days and past activities that still need an update. Tap an item to open it, or **View Activities** to see them all.

IN THE PICTURE

1. Activities coming within 3 days, or past ones still waiting for an update
2. View Activities opens the Activities page
3. Dismiss closes the pop-up

To delete an activity, open it, tap **Edit**, then **Delete**. The system asks for your password, and the deletion is recorded in History.

CHAPTER 5

History

A permanent record of who changed what, and when. It protects the ministry and every administrator.

5.1 What is recorded

History notes every **Added**, **Edited**, **Deleted**, **Imported** and **Role removed** action on members and activities, every **Photo added**, **Photo changed** and **Photo removed** event, and every **Password changed** event. Each entry shows:

- what happened and to whom or what,
- the date and time,
- the **email of the admin** who did it,
- for edits, each changed field with the old value, an arrow, and the new value.

5.2 Reading the History page

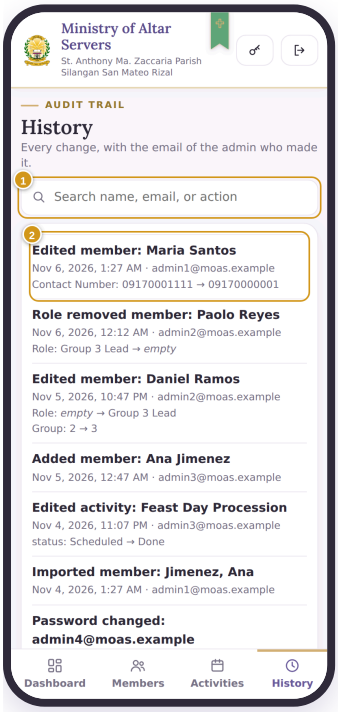

FIGURE 27

The History page

The newest changes are at the top, 8 per page. Type a name, an email or an action such as *Deleted* in the search box to find an entry.

Each member's profile also shows the history of that member only.

IN THE PICTURE

1. Search by name, email or action
2. One change: what happened, when, who, and before and after values

> **NOTE**
> History **cannot be edited or erased** by anyone using the system. This is enforced in the database, not only on the screen, so every change stays accountable to the admin's email.

History starts from the day the feature was switched on. Earlier changes are not recorded. Entries for deleted records keep a copy of what was deleted, so treat the History page with the same care as the

member records themselves.

CHAPTER 6

Import, Export and Reports

Bringing records in from a file, and producing attendance sheets, member lists and reports.

6.1 Importing members from a file

Use this to move records from another list. It is rarely needed. Import accepts **CSV** files only. If your list is in Excel, open it and use **Save As**, then choose **CSV**.

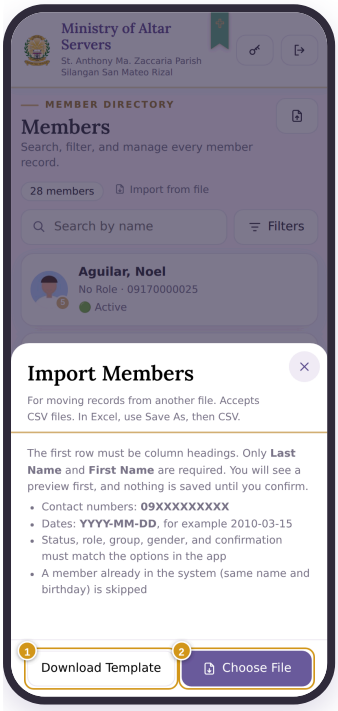

FIGURE 28

Import Members

Tap **Import from file** on the Members page. Tap **Download Template** to get a file with the correct column headings, fill it in, then tap **Choose File**.

IN THE PICTURE

1. Download Template
2. Choose File

Rule	Example
Only Last Name and First Name are required	Santos, Maria
Phone numbers: 11 digits starting with 09	09171234567
Dates: year-month-day	2010-03-15
Status, role, group and gender must match the options in the app	Active, Group 3 Lead
A member already in the system (same name and birthday) is skipped	-
Maximum size	5 MB or 2,000 rows

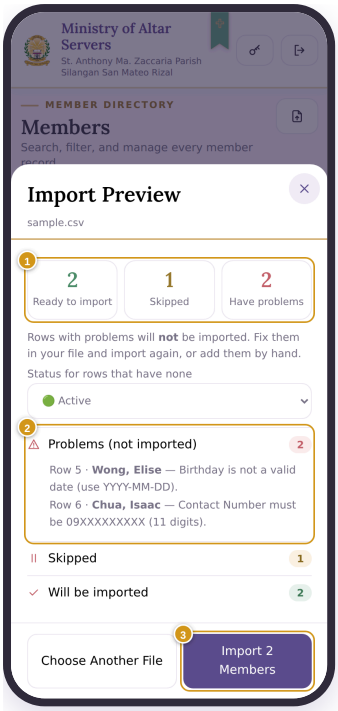

FIGURE 29

The preview

Nothing is saved until you confirm. The preview counts the rows that are ready, skipped (already in the system) or have problems, and explains each problem. Rows with problems are not imported: fix them in your file and import again, or add those members by hand.

Tap **Import**, then enter your password. Imported members are recorded in History.

IN THE PICTURE

1. Ready, skipped, and problem rows
2. Rows with problems are listed with the reason
3. Import

6.2 Exporting member lists

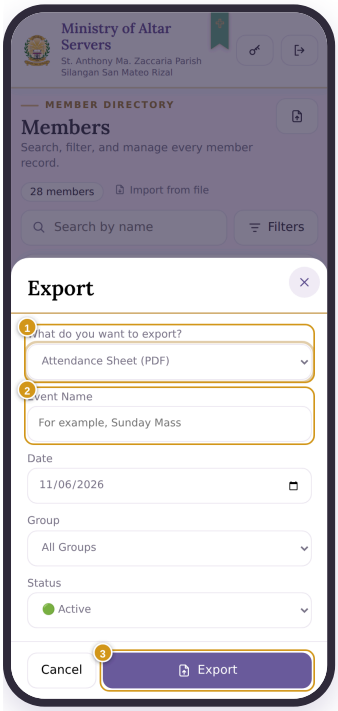

FIGURE 30

The Export window

On the Members page tap **Export**. Choose what you need:

- **Attendance Sheet (PDF)**: a printable table with Time In, Time Out and Signature columns. Enter the event name and date, and choose a group and status (Active is set for you).
- **All Member Details (PDF)** or **(CSV)**: a full list with contact details and addresses, for use in Excel or Google Sheets. The system asks for your password first.

IN THE PICTURE

1. What to export
2. Event name (attendance sheet)
3. Export

IMPORTANT

Full member details include addresses and phone numbers of minors and their families. Use them only when needed, never send them by messaging apps, and delete the downloaded file when you are done.

6.3 Printing and saving PDFs

Attendance sheets, profiles and reports open your device's print window. To keep a file instead of printing, choose **Save as PDF** as the destination. On a phone, use the share or print option that appears. A printed profile includes the member's photo. The other exports and reports do not.

6.4 The Ministry Report

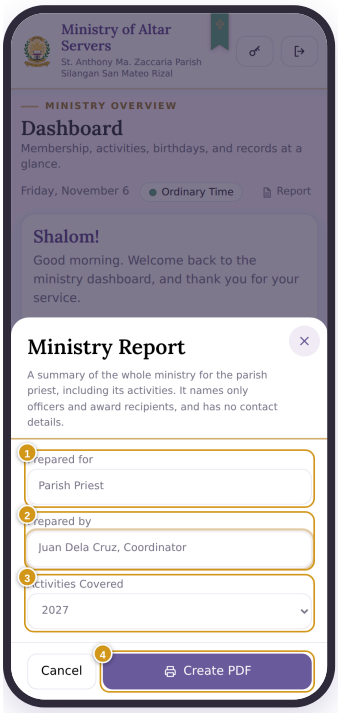

FIGURE 31

Ministry Report

On the dashboard, tap **Report**. Enter who it is for (the parish priest is filled in) and who prepared it, and choose which year of activities to include. Tap **Create PDF**.

The report summarises the total membership, members by group with their Sunday Mass times, members by status, the officers and leaders, the year's activities and how many were carried out, Confirmation records, awards, and points that need attention. It has signature lines, and **contains no contact details**.

IN THE PICTURE

1. Prepared for
2. Prepared by (your name and position)
3. Which year of activities to include
4. Create PDF

The Activities page has its own **Export** for the Activity Review. It is made for pre-planning meetings: it groups the year's activities by type and by month, lists the full details, and shows items to review, with a notes box and signature lines. Activities can also be exported as a CSV.

CHAPTER 7

Security and Privacy

The records include the names, addresses and contact numbers of young people and their families. Looking after them is a serious duty.

7.1 How the system protects the records

- Only accounts created by the head admin can sign in.
- Sessions end after 10 minutes of inactivity, and after 8 hours at most.
- Five wrong passwords lock sign-in on that device for 5 minutes.
- Your password is asked again before deleting, importing and exporting full details.
- History records the email of every admin who made a change, and nobody can erase it.

7.2 What every administrator should do

Do	Do not
Use a long, unique password and change it if you think someone saw it	Share your login with anyone, including other admins. Each person has their own account.
Sign out after every session, especially on shared devices	Leave the system open on a phone or laptop you put down
Lock your phone and laptop with a code or fingerprint	Post screenshots of member data on social media or chat groups
Delete downloaded exports and printouts you no longer need	Send full member lists by chat apps or public email
Check that you are on the correct website address before typing your password	Type your password after following a link from a message you did not expect
Add a member's photo only with the parent or guardian's permission	Share a member's photo outside the system without that permission

7.3 Personal data and the law

The Philippine Data Privacy Act (Republic Act 10173) protects personal information, and children's information needs special care. Only collect what the ministry needs, share it only with people who need it for their service, and keep it only as long as it is useful. If a family asks to see or correct their information, or to have it removed, tell the head admin so it can be handled properly.

IMPORTANT

If your phone or laptop is lost, or someone may know your password: change your password immediately (or use Forgot password? from another device) and tell the head admin. The head admin can disable an account at once.

CHAPTER 8

Troubleshooting and FAQ

What a message means, and what to do about it.

8.1 Messages and what to do

You see	What it means	What to do
Wrong email or password	One of them is incorrect	Check both carefully, using the eye to see the password. Then try Forgot password?
Too many failed attempts	Five wrong attempts, or too many requests	Wait the time shown (about 5 minutes), then try again
No internet connection / This is taking longer than expected	The connection dropped	Check your signal. A change saves automatically once you are back online.
This account does not have access to the member records	Your email is not on the approved list	Tell the head admin, who must add your email to the access rules
Could not load activities	The activities permission is missing	Tell the head admin
This website address is not authorized	The site address is not approved in Firebase	Tell the head admin (see Chapter 9)
Enter 11 digits starting with 09	The phone number is not in the required format	Type it as 09XXXXXXXXX with no spaces or +63
Could not save. Check your connection	The change did not reach the database	Check your connection and try again
That file could not be read as a picture	The chosen file is not a normal picture	Choose a JPG or PNG picture
Could not save the photo	The connection failed, or the photo rule is missing	Check your connection. If it keeps happening, tell the head admin (see 9.3)
You were signed out after 10 minutes of inactivity	The automatic timeout	Sign in again
Could not find the Last Name and First Name columns	The import file's first row is not a heading row	Use the template, or rename your headings

8.2 Frequently asked questions

The password email did not arrive.

Look in Spam or Promotions. Check that you typed the email correctly, wait a few minutes, and use Forgot password? again.

Can two admins use the system at the same time?

Yes. Changes appear on everyone's screen within moments. If two people change the same record, the last save wins, and History shows both changes.

Can I get back a deleted member?

No. Deleting is permanent. History shows what the record contained, so you can add the member again by hand. Prefer changing the status.

A member is missing from the group bars on the dashboard.

They have no group assigned. A note under the bars says how many members have no group.

The page looks old after an update.

Refresh the page. On a laptop press Ctrl and F5 together. On a phone, close the tab and open it again.

Why can I not make someone a Group Lead for another group?

A Group Lead must belong to their own group. Choosing the role sets the group for you.

CHAPTER 9

For the Head Admin

Tasks that only the person who manages the accounts and the website needs to do.

9.1 Adding an administrator

1. In the Firebase console open **Authentication**, then **Users**, and select **Add user**.
2. Enter the person's email and any long random password. Do not send this password to anyone.
3. Open the user's menu and choose **Reset password**, or ask them to use **Forgot password?**. They receive a link and choose their own password.
4. Add their email to the list in the Firestore rules (see 9.3) and publish the rules. Without this step they can sign in but see no data.

> **TIP**
> Never email a temporary password. A reset link lets each admin choose a password that only they know.

9.2 Removing an administrator

1. Delete or disable the account in **Authentication**.
2. Remove their email from the Firestore rules and publish.

Do this on the same day someone stops serving as an administrator.

9.3 The access rules

The Firestore rules are what truly protect the data. They allow only listed emails to read or write, and they make History permanent by allowing entries to be created but never changed or deleted. In the Firebase console open **Firestore Database**, then **Rules**, and keep the list of admin emails in the **isAdmin()** function up to date, with one entry per administrator. The rules must also include the **photos** rule given in the README. Without it, saving a photo fails.

9.4 Backups

Once a month, export **All Member Details (CSV)** and the activities CSV, and keep them in a safe, private place, such as an encrypted folder or the parish office computer. Delete older copies you no longer need. The Firebase console can also export the whole database.

9.5 Updating the application

The website is hosted on GitHub Pages. To publish a new version, replace the **index.html** file in the repository with the new one and commit the change. After about a minute the site updates. The records are stored separately, so an update never changes them. Afterwards, ask the administrators to refresh the page.

9.6 Settings you may need to change

Setting	What it controls
GTIME	The Sunday Mass time shown for each group
STATUS, ROLES, GROUPS	The choices in the member form
ATYPES	The list of activity types
NOTIFY_DAYS	How many days ahead the sign-in reminder looks (now 3)
IDLE_MS, MAX_MS	Inactivity timeout (10 minutes) and longest session (8 hours)

These are near the top of the script in **index.html**. Take care when renaming a status or role, because existing records keep the old name.

9.7 Photos and storage

Photos are saved in the same Firebase database as the member records, in a small 96 px copy inside each member and a 320 px copy in a separate **photos** collection. Each photo takes roughly 15 to 40 KB, so even a few hundred photos use a tiny part of the free plan's storage. You can see usage in the Firebase console under Firestore, then Usage. Deleting a member also deletes their photo.

9.8 One-time security settings

- Limit the Firebase API key to the website address, in the Google Cloud Console under *Credentials*.
- Turn off public sign-up in Firebase Authentication settings, if the option is shown.
- Keep the website address listed under *Authorized domains* in Firebase Authentication.
- Do not store exports, screenshots or real member data in the code repository.

QUICK REFERENCE

Quick Reference

Keep this page handy. Print it for new administrators.

I want to...	Go to...	Then...
Sign in	The website address	Email, password, **Sign In**
Change my password	Header, key button	Current password, new password twice, **Change Password**
Add a member	Members, **Add Member**	Fill the form, **Save Member**
Find a member	Members, search box	Type part of the name
Edit or print a profile	Members, tap the member	**Edit** or **Print Profile**
Add or change a photo	Member profile, tap the photo circle	**Take Photo** or **Choose Photo**, adjust, **Use Photo**
Make someone a Group Lead	Member, **Edit**, Role	Choose Group N Lead. The group is set for you.
Schedule an activity	Activities, **Add Activity**	Title, date, **Save Activity**
Record the result	Activities, tap the activity	**Mark Done** or **Mark Not Done**
Print an attendance sheet	Members, **Export**	Attendance Sheet, event name and date
Create the report for the parish priest	Dashboard, **Report**	Fill the names, **Create PDF**
